

## Erwin Scheibner

Erwin Scheibner made a huge contribution to NSW geology and he influenced much exploration thinking. Erwin passed away in Rylstone in late June. He was in a nursing home after having a stroke some years ago.

Erwin essentially introduced plate tectonics to the interpretation of eastern Australia and made substantial contributions on the world stage including to the IUGS Circum-Pacific tectonic map.

Erwin's family have asked for those who wish to join with them on 14 September at the Dining Room from 12:30pm to 2:30pm in the Commercial Travellers Club in City for a Farewell.

Those who wish to attend should contact Toby Rose at the email address:

[trose\\_1@bigpond.com](mailto:trose_1@bigpond.com)

RSVP 2 September.
